

【PRECAUTIONS】

- 1. Do not use sharp instruments to scratch the skin surface, and do not knead hard to avoid damaging the skin, affecting the use time and appearance.
- 2. When wearing clothes for physical dolls, you should avoid wearing clothes that are easy to fade or have poor coloring skills, so as not to pollute the doll's skin and affect the appearance
- 3. Do not place the doll in direct sunlight for a long time, so as not to cause d eterioration of the rubber material and affect the service life.
- 4. It is forbidden to position the legs at 180 degrees, and it is forbidden to raise the hands upward. If the non-standing model stands, the skeleton of the foot will pierce the skin and expose the skin. After use, it should be restored to a suitable lying position as soon as possible. (Due to the particularity of the product mold, the height of the doll needs to be measured manually by straightening the toes. Please refer to the measurement method of our store.

The manual measurement error is about 3cm)

【MAINTENANCE INSTRUCTIONS】

1：【How to deal with indentation?】

If there are indentations on the surface of the doll due to long-term extrusion, you can use a hot towel to apply heat to the doll for a period of time.

2：【How to clean up the doll when it is dirty?】 If there is dust and pollutants on the surface of the doll, it can be cleaned with general cleaning agent or cleansing oil, such as laundry detergent, shower gel, etc, but avoid scratching the skin surface with fingers and nails vigorously.

3：【What should I do if I find a crack or crack somewhere in the doll?】 f there is a small area of wound on the surface of the doll, you can use repair glue to bond it. First, wash the damaged surface, restore the glue at the mouth to its original position, and then apply a layer of glue evenly, and wait for half an hour.

After the left and right sides are dry and solid, if you have other technical stocks, you can directly contact the seller or manufacturer to provide processing technology according to the situation.

4：【How to use repair agent?】 The principle of the repairing agent 【glue】 is to melt the glue on both sides of the hole during the repair process, which is harmless to the human body, please rest assured to use) and then re-melt the two sides around the hole. Under normal circumstances, it will not affect the hole. The mouth is beautiful after repairing, but when the gap is not closed after the repair glue is applied during the operation, do not scoop up the repair agent, wash it with a damp cloth or clean water, and then apply the repair agent, otherwise the gap will not be cleaned. If you continue to apply the repair agent under the circumstances, the crack will melt more and more on both sides around the crack due to the melting of the glue.

5：【What should I do if the doll is dyed?】 Use a decolorization paste specially designed for TPE thermoplastic elastomer dyeing, which is efficient, convenient, fast, and non-toxic. It can remove local staining within a period of time. The method of use is as follows:

(1)Dip an appropriate amount of ointment with a cotton swab according to the degree of staining, and apply it evenly on the stained area.

(2)The stained part will fade naturally after being left for a period of time after application, and it will be wiped again every 4 hours until it is removed. The fading time depends on the depth of the dyeing. Small areas of staining generally fade within 24 hours. Severe staining is generally removed in 3-4 days.(Color removal cream can only slow down the decolorization to varying degrees. Slight staining can be removed, and severe staining can be slowed down, but cannot be completely removed)

(3) Reminder: This product is certified safe and non-toxic
